

RANA EZZAT HASSAN

COMPUTER SCIENCE STUDENT | ASPIRING DATA ENGINEER

Mansoura, Egypt | +20 109 278 5552 | ranahassn1712006@gmail.com | linkedin.com/in/rana-hassan-64249b38b

PROFESSIONAL SUMMARY

Detail-oriented Computer Science student at Mansoura University with a strong specialization in Data Engineering and Cloud Computing. Proficient in Python, SQL, C#, and relational database management with hands-on experience in object-oriented design and data structures. Currently expanding practical expertise in Microsoft Azure, data pipelines, and cloud architecture through intensive technical training programs (DEPI & NTI).

EDUCATION

Bachelor of Science in Computer Science

Expected Graduation: 2028

Mansoura University – Faculty of Computers and Information | Mansoura, Egypt

TECHNICAL SKILLS

Programming Languages: Python, C#, SQL, JavaScript, HTML, CSS

Databases & Data: Relational Databases (SQL Server/MySQL), Database Management Systems (DBMS), Data Pipelines, Data Processing, Data Warehousing, Data Lakes

Cloud Technologies: Microsoft Azure, Cloud Computing Fundamentals

Software Concepts: Object-Oriented Programming (OOP), Data Structures, Algorithms, File Handling, Exception Handling

Developer Tools: Git, GitHub, Jupyter Notebook, Visual Studio, VS Code

TECHNICAL TRAINING

Microsoft Data Engineer Track

Digital Egypt Pioneers Initiative (DEPI)

- Studied core Data Engineering fundamentals, ETL process design, and data pipeline orchestration.
- Gained practical skills in advanced SQL querying, relational database design, and management.
- Utilized Microsoft Azure services for cloud-based data storage and processing workflows.

Cloud Essentials Program

National Telecommunication Institute (NTI)

- Mastered fundamental cloud computing concepts, service models (IaaS, PaaS, SaaS), and deployment strategies.
- Explored modern cloud architecture, virtualization, and infrastructure scaling methods.

PROJECTS

Hospital Management System

C# | Windows Forms | File Handling

- Engineered a desktop application to streamline hospital workflows, patient scheduling, and administrative operations.
- Applied Object-Oriented Programming (OOP) principles, inheritance, enums, and structured file handling.
- Implemented core modules for doctor schedules, patient profiles, medical appointments, and admin management.
- Designed custom logic to validate appointment availability, successfully eliminating double-booking issues.

Data Engineering Architecture Exploration

Data Architecture | Big Data

- Analyzed Enterprise Data Engineering architectures, covering Data Lakes, Data Warehouses, and ETL workflows.

- Explored theoretical paradigms and use cases for batch processing versus real-time streaming architectures.

SOFT SKILLS & LANGUAGES

Soft Skills: Problem Solving, Teamwork & Collaboration, Technical Communication, Time Management, Continuous Learning, Presentation Skills

Languages: Arabic (Native), English (Good Working Proficiency)
